

# ICE Pyrotechnics

Manufacturer of Pyrotechnic  
Cloud Seeding Flares

These pyrotechnic flares have been developed by a team of chemists and engineers who have over 60 years of experience collectively in the weather modification industry.

Field-proven ICE flares are extremely reliable and efficient on weather modification projects throughout the world. Tests have been conducted by the Cloud Simulation and Aerosol Laboratories, Department of Atmospheric Science, Colorado State University, Fort Collins, Colorado, USA.

## Advantages of ICE Pyrotechnics

- Wider temperature range spectrum for nucleation
- 90% of nucleation takes place in the first two minutes of burning
- Field-proven reliability and efficiency
- Best pyrotechnic available worldwide on a per gram basis
- Products available for immediate delivery
  
- Custom-designed pyrotechnics at customer's request
- Additional specifications and test results available upon request

## Applications of ICE Pyrotechnics

- Rain Enhancement
- Fog Dispersion
- Hail Suppression
- Snow Pack
