Aero Systems (ASI) has been involved in weather modification and research activities since it was formed in 1974 by William J. Carley. For over thirty-five years ASI has provided the design, manufacture and installation of weather modification equipment to meet the needs of our customers. From planning to the installation we work closely with our customers to ensure satisfaction.

The employees at ASI have worked hard to bring you the best in design and technology available in the manufacturing of these units.

ASI EB-00-038-1H End Burning Flare Rack

ASI End Burning Flare Rack with optional Hygroscopic Adapter

ASI EJ-05-102-1 Ejectable Flare Rack

ASI Ejectable Flare Rack for Aircraft Belly Mount

ASI and its respected personnel manufacture flare racks, generators, manual and solid state firing control systems adaptable to most types of aircraft used in the industry. All of the racks and generators are designed and built for strength and safety, bolting directly to structural points on the aircraft. As a FAA Certified Repair Station we work closely with FAA authorities to ensure the work is completed in compliance with Federal Aviation Regulations.

MARK II Solid State Controller

The Mark II is custom built and designed to accommodate each customers requirements and aircraft.
